

Integrate Handwritten Notes and Markup into PDF Files

Capturx Markup for PDF helps geographically-dispersed teams accelerate collaboration. Using a digital pen and standard paper printouts, handwritten notes and markups are integrated into PDF files which can be shared with anyone who has access to Adobe® Reader®. Through Bluetooth® and optional Capturx Mobile software, remote workers email their digital ink from a mobile device to team members who have a computer with Capturx Markup for PDF installed.

Instrumental in a variety of mobile worker scenarios, including inspections, field service, and project management, Capturx Markup for PDF software automates paperwork, enabling teams to eliminate data-entry time and costs, complete reports faster, capture signatures, and reduce risks from compliance gaps and poor operational visibility.

For users of TerraGo Technologies®, Capturx for PDF supports GeoPDF files. Digital markups are automatically geo-registered, seen using TerraGo's free toolbar. Also, users can export these annotations into a KML file which can then be viewed with Google Earth® and Google Maps®.

Streamline Communication of Handwritten Notes and Markups

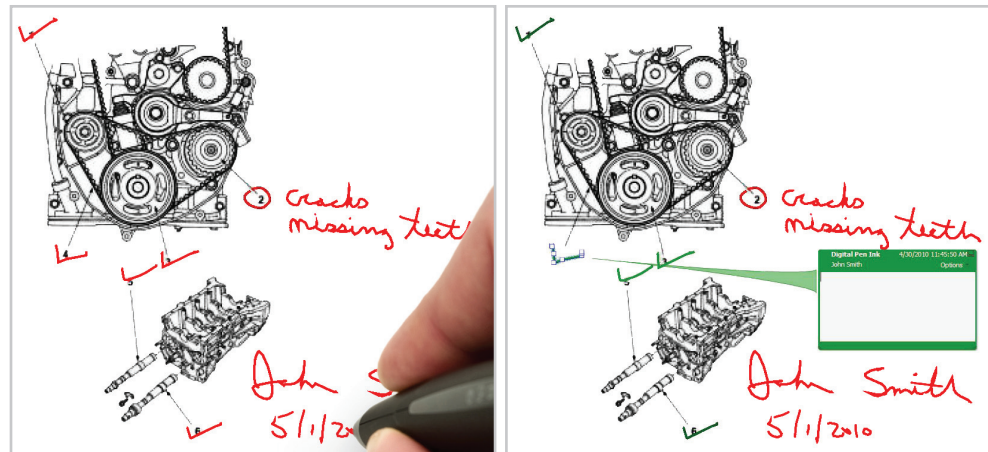

Digital pen instantly records and software emails data via PCs or cell phones.

Improve Productivity and Reduce Risk

No more scanning, data entry, or risk from missing documents.

Works the Way You Do

Write with a pen on a paper printout from a standard PDF file.

Write notes in the field, and then convert the notes to digital ink without scanning or data entry.

Components of Capturx Markup for PDF

Capturx Markup for PDF Software

The software enables PDF files to be printed on normal paper with a watermark that makes it digital. Once digital markups are downloaded to a computer, they are integrated into the target PDF file.

Digital Pen and Docking Station

A digital pen writes with regular ink, and records and saves data. The pen includes a powerful processor, memory, and rechargeable battery.

Optional - Capturx Mobile

Using Bluetooth® and Capturx Mobile software, remote workers can email their digital ink from a mobile device to any team member with a computer that has Capturx Markup for PDF installed.

Key Features

Integrate Handwritten Drawings and Notes into Original PDF Files. Easily share markups from geo-dispersed team to speed project communication.

Coordinate Input from Multiple Team Members. Markups and comments made by mobile and remote team members incorporated into the original PDF file.

Automatically Track the Author, Date and Time of Markups. Preserve the integrity of handwritten data by keeping an audit trail of who made the changes and when.

Print Digitally-Enabled PDF Files on Ordinary Paper. Print PDF files on letter to E size plotter paper using many common color printers.

Durable Pen Works When and Where You Work. Carry and use the pen whenever and wherever you need it, even in extreme hot or cold conditions.

Geo-Registered Digital Markups. GeoPDF files can be marked-up using the same Capturx technology.
