

Quick Start Guide

Thank you for purchasing Capturx!

This quick start guide will walk you through installation and getting started with Capturx Mobile for BlackBerry in 4 main steps:

1. Confirm System Requirements.
2. Download Capturx Mobile for BlackBerry on your mobile device.
3. Select the Capturx Mobile icon.
4. Pair your BlackBerry device with the Digital Pen.

Capturx Mobile for BlackBerry Installation and Pairing

1. Confirm System Requirements.

- BlackBerry version 4.3 or greater, 4.5+ recommended
- Ensure you have correct system requirements and a phone plan that includes email
 - ⇒ *Due to different hardware and software options, some Blackberry devices will not be supported. For more details: <http://adapx.com/support/kb/article/34>*

2. Download Capturx Mobile for BlackBerry.

- A. Via your BlackBerry, access the link found in your shipping/fulfillment confirmation email.
 - ⇒ *Note: Capturx Mobile for BlackBerry is downloaded directly to the device. BlackBerry Enterprise Server (BES) is supported – please check with your Adapx Sales Engineer for assistance.*
- B. Submit your unique password, found in your shipping/fulfillment confirmation email.
- C. Begin download and follow the prompts.

3. Select the Capturx Mobile Icon.

- A. Locate the "Capturx Mobile" icon on the BlackBerry's home screen.

If you don't see the icon, it may be in your Download Folder. For convenience, you may want to move the icon to the BlackBerry's home screen.
- B. Restart the phone after install, then select **Yes** when a prompt appears asking you to grant Capturx full trust.
- C. If prompted to enable Bluetooth, select **Yes**.

3. Select the Capturx Mobile Icon. (continued)

- D. Select I Accept after reading the End User Licensing Agreement.
- E. Capturx Mobile for BlackBerry screens and options can now be accessed. See Capturx Mobile for BlackBerry User Guide for details on setting up the configuration: <http://adapx.com/support/capturx-mobile>

4. Pair Your BlackBerry with the Digital Pen.

⇒Note: To activate the digital pen and set its clock, the pen must be docked at least once at a Windows computer which has Capturx Pen Manager installed.

- A. Uncap the digital pen.
- B. Navigate on BlackBerry home screen, select **Manage Connections**, then select **Set Up Bluetooth**, and select **Listen** or **Search** to search for the digital pen Bluetooth signal.
- C. If you selected Listen, use the Capturx Pen Utility Card by checking the Bluetooth Pair to Phone checkbox found on the back of the card.
⇒Once the two devices sync, the Bluetooth device list appears.
- D. Select digital pen device name **"DP-201"***
- E. Enter the 4 digit pin number** of the digital pen when you see a dialog requesting: **Enter Numeric Pass key**.

Now that Capturx Mobile for BlackBerry has been installed on your BlackBerry device, and the digital pen has been paired with your BlackBerry, it's time to complete your initial data upload!

To Get Started, the following components are needed: paired digital pen, Capturx printout, BlackBerry mobile device, and a laminated Capturx Pen Utility Card (physically shipped to customer location). When ready to send pen data to the BlackBerry, check the **Send Pen Data** to Phone box on the Capturx Pen Utility Card with the digital pen, and data is sent automatically. If your form has a Send to Phone tick box printed on it, you will not need to use the laminated card.

Please consult the Capturx Mobile for BlackBerry UserGuide for more details <http://adapx.com/support/capturx-mobile>.

* If "DP-201" doesn't appear, cap and uncap digital pen to refresh device list.

** PIN number is provided in digital pen box on a label or located using Capturx Pen Manager by docking the digital pen to a PC.
